Abstract of the Disclosure

The ~~object of the invention is firstly a composition A~~ for dyeing fibers (A),
~~the composition being~~ is obtained before use by mixing a component A1,
 containing at least one enamine of the formula (I)

with a component A2, containing at least one carbonyl compound. A compound,
~~secondly a multi-component kit for dyeing and, later on, decolorizing fibers, the~~
 kit consisting of the dyeing agent A and a decolorizing component B containing a
 sulfite, and ~~thirdly a method for temporarily dyeing hair with the composition A~~
and later removing the dyed hair color with the decolorizing component B are
also provided.
